Arboretum

A · https://fo.umich.edu/fosg/arboretum/

Nichols Arboretum operates independently of Facilities & Operations. However, we do provide some support services.

Because the buildings located in the Arb are covered in the General Fund, Maintenance Services is responsible for the maintenance of structures in the Arb. This includes repairs to the human and doggie drinking fountains.

Grounds Services has little to do with the maintenance of the grounds in the Arb, unless work is requested by the persons who oversee the Arb. Grounds does receive some funding for tree trimming and tree removal work on an annual basis. Grounds also performs snow removal to the Burnham House and Botanical Garden in support of the U-M bus services in winter. Custodial Services is responsible for custodial services at both the Burnham House and the Botanical Gardens.
